Deadline for manuscript
submissions:
closed (30 October 2024)

Message from the Guest Editor

Congenital heart disease (CHD) refers to a group of structural heart abnormalities that are present at birth. It is a complex and diverse condition, affecting individuals of all ages and requiring specialized medical attention. This Special Issue aims to explore the latest advancements in the clinical understanding, management, and treatment of CHD.

Over the years, significant progress has been made in the diagnosis and evaluation of CHD, facilitated by advanced imaging techniques and genetic testing. Improved screening programs and early detection have enhanced patient outcomes, leading to timely interventions and better management strategies. Cutting-edge technologies and innovative approaches have revolutionized the management of CHD. Minimally invasive procedures, transcatheter interventions, and 3D printing have expanded treatment options and offered personalized solutions for complex cases. Moreover, advances in medical devices and surgical techniques continue to enhance quality of life for CHD patients.

We invite original research articles, comprehensive reviews, and clinical studies that contribute to the existing knowledge of CHD.

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPUS / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
