Deadline for manuscript
submissions:

25 July 2024

Message from the Guest Editor

Dear Colleagues,

Osteoporosis is a common condition characterized by low bone density and an increased risk of fractures. Bone fracture may be the result of impact or stress, or could be a result of certain medical conditions that weaken the bones, such as osteoporosis.

This Special Issue covers a range of topics related to the clinical management of osteoporosis, including the latest advancements in diagnosis, treatment, and prevention strategies. It also explores the impact of osteoporosis on fracture risk and the management of orthopedic trauma in elder patients. Additionally, this Special Issue delves into future perspectives in the field, including emerging therapies, novel diagnostic techniques, and potential advancements in personalized medicine.

We look forward to receiving submissions from medical practitioners from a wide range of backgrounds to provide a comprehensive overview of this important topic.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
