Deadline for manuscript
submissions:

31 July 2024

Message from the Guest Editor

Cardiovascular diseases remain a leading cause of mortality worldwide. In spite of innovative treatments, both through pharmacological and interventional approaches, CVD continue to progress, especially because of the increased incidence of diseases, such as diabetes or other well-established CV risk factors, but also because of cumulative comorbidities and emerging risk factors (sleep disorders, chronic inflammation, psychiatric disorders, etc.).

In this Special Issue dedicated to *risk factors, comorbidities and prevention*, we are interested in original and review articles that (1) assess short- and long-term clinical outcomes as a consequence of various advances in this area, (2) highlight unmet needs, and (3) discuss future research directions.

Various clinical settings and comorbidities should be better known by physicians.

The editors hope that this issue will be of interest to not just cardiologists, but also to a broader range of clinicians that encounter cardiovascular diseases, especially those who are engaged to struggle comorbidities.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
