Message from the Guest Editor

Dear Colleagues,

The field of hepatobiliary surgery and liver transplantation has witnessed significant progress, with minimally invasive procedures, advanced imaging technologies, refined surgical techniques, and enhanced perioperative care contributing to improved outcomes. Our ability to surgically treat complex diseases in the liver, biliary system, and pancreas, is constantly expanding, accompanied by a growing range of indications for surgery and transplantation. Furthermore, procedures once exclusive to specialized referral center are now being performed in smaller HPB and transplant centers worldwide.

To this end, I invite clinicians, researchers, and experts in HPB and liver transplantation to contribute their insights and research findings to a dedicated volume focused on the advancements in the field. This volume aims to create a platform for sharing expertise, discussing novel approaches, and fostering collaboration. Key topics of interest include the exploration of biomarkers and outcome prediction, advancements in complex liver and pancreas surgeries, and the development of innovative surgical techniques.

Dr. Niv Pencovich

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
