Message from the Guest Editor

The early stages of heart failure are usually well managed by medical therapy and additional supportive means, worsening or advanced heart failure may require further steps. While heart transplantation entered the scene in the 1960s, mechanical circulatory support in terms of left ventricular assist devices have traditionally gained importance due to a shortage of donor organs. In the meantime, they have overcome the role of bridge to transplant devices. Now, left ventricular assist devices are often implanted as bridge to decision or destination therapy. The aim of this Special Issue is to present original scientific research addressing the identification of patients at risk of experiencing worsening or advanced heart failure, and to mirror the challenging therapeutic scenario of heart transplantation and temporary or permanent mechanical circulatory support.

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPUS / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
