Message from the Guest Editor

Dear Colleagues,

The development of a multitude of biological drugs (TNF- α inhibitors, anti-IL17/23 blockers) and small molecules (e.g., PDE4 inhibitors, TYK2 inhibitors) has led to significant advances in the treatment of psoriasis. These drugs are changing patients' quality of life and they are also helping clinicians to better understand psoriasis's pathophysiology; however, data are still limited on the place in therapy of different drugs in each subpopulation of patients, according to comorbidities, disease severity, and previous exposure to other systemic drugs. Furthermore, the search for biomarkers that might help with classification and therapy selection is still ongoing. In this Special Issue, we will focus on the new upcoming challenges in managing psoriasis, with a particular interest in real-world experiences. The final aim of this Special Issue is to explore all of the efficacy and safety data coming from real-life experiences in or already-published literature (reviews are encouraged) on managing psoriasis with different treatment options.

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPLUS / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
