submissions:

25 November 2024

Message from the Guest Editor

Dear Colleagues,

The field of intracranial aneurysm treatment is evolving rapidly, both in terms of improving the results of aneurysm obliteration and the safety of treatments, but also in terms of providing a better standard of care for patients with subarachnoid hemorrhage. With the high volume of research being conducted every year in various centers all over the world, it is important to collate the highlights of this research in a Special Issue. There are many unknown questions waiting to be answered, and choosing the right approach for the right patient still remains an elusive, intricate issue. Therefore, I invite you to submit updates in this fascinating area of interest to the forum of open access scientific debate housed within this Special Issue.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
