Deadline for manuscript
submissions:

15 November 2024

Message from the Guest Editor

Maternal Fetal Medicine (MFM) is a specialized branch of obstetrics that focuses on the management of high-risk pregnancies and the care of both the mother and the fetus. Perinatal management refers to the overall care and support provided to pregnant women and their unborn babies. It includes prenatal care, monitoring the health and development of the fetus, managing any complications or risks, and making decisions regarding the timing and mode of delivery. This Special Issue titled "Maternal Fetal Medicine and Perinatal Management" covers a wide range of topics, including such as preeclampsia and gestational hypertension, gestational diabetes and other metabolic disorders, multiple pregnancies such as twins or higher-order multiples, fetal growth abnormalities or intrauterine growth restriction, preterm labor and the premature rupture of membranes, and fetal congenital anomalies or genetic disorders. We look forward to your contributions to the ongoing advancement of Maternal Fetal Medicine and perinatal management.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
