### Message from the Guest Editors

Dear Colleagues,

Considerable expansion of percutaneous heart structural interventions has been witnessed in the last few decades. In our previous Special Issue, we investigated challenges with transcatheter aortic valve replacement. In Part II of this Special Issue, we would like to focus on the other aspects of structural heart interventions, including, but not limited to, patent foramen ovale or atrial septal defect percutaneous closure, transcatheter mitral/tricuspid valve replacement and clipping, and percutaneous left atrial appendage occlusion. We aim to explore current and future indications and detail the ongoing challenges by providing state-of-the-art reviews and original researches dedicated to each of these interventions.

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (General Medicine)
