Message from the Guest Editors

During the last few years, we have witnessed a significant progress in the field of male Lower Urinary Tract Symptoms (LUTS) from diagnosis to management. The goal of this Special Issue is to update the knowledge of the practicing clinician and provide a comprehensive collection of original articles, reviews, and editorials.

To this end, we would like to invite state-of-the-art reviews, including reviews of new technology and therapeutics, as well as original research in this field for inclusion in this issue. Examples include:

- New insights in the assessment of LUTS
- Possible role of inflammation and metabolic syndrome in the development and management of LUTS
- Occurrence and management of adverse events of medical therapies
- Patients' adherence to medical treatment
- Reviews of surgical modalities and emerging technologies for benign prostatic obstruction
- The investigation of the rapidly developing of mobile health and its potential use in urology to provide better care for LUTS

This Special Issue aims to present the most recent advances in male LUTS, as well as their implications for future patient care. We look forward to your submissions!

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
