Message from the Guest Editors

Dear Colleagues,

Subarachnoid hemorrhage (SAH), primarily caused by ruptured intracranial aneurysms, is a serious condition that causes severe disability primarily in young, productive adults. For decades, it has been treated with surgical arterial clipping or, more commonly, endovascular treatment. Cerebral vasospasm (CVS) is the most common complication after subarachnoid hemorrhage (SAH), and it is also an important cause of death and disability in SAH. Active prevention and treatment of CVS is the key to improving the prognosis of SAH.

The purpose of this Special Issue is to provide an up-to-date overview of the clinical diagnosis, treatment, and management of subarachnoid hemorrhage. We seek original, high-quality research papers, as well as review articles, that address major research challenges and achievements on the topic.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
