Message from the Guest Editor

Keratoconus is a progressive, frequently asymmetric, inflammatory corneal thinning disorder characterized by changes in the structure and organization of corneal collagen. Modern anterior segment imaging techniques, such as Scheimpflug photography and optical coherence tomography, have significantly improved our ability to identify eyes with keratoconus, as they also provide pachymetric data and posterior corneal curvature measurements. As for keratoconus treatments, corneal cross-linking was first introduced as a promising technique to slow or stop disease progression. There have been various modifications to standard CXL, such as increasing the intensity of ultraviolet-A irradiation and shortening the exposure time without altering the total energy delivered. Another modification has been to perform CXL through an intact epithelium with less discomfort to the patient and reduced postoperative complications.

This Special Issue will feature articles on recent developments in keratoconus. We therefore invite researchers to submit original research and review articles on cutting-edge technologies that will contribute to the diagnosis and management of keratoconus.

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPUS / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
