Message from the Guest Editor

Dear Colleagues,

Modern medicine is heading toward a personalized approach, and the definition of prognosis is a fundamental aspect of this strategy. The ability to predict disease evolution allows allocating the right therapy to the right patient, but also preparing the patient and the caregiver for the challenges that they will have to face. There are still several neurological conditions lacking a disease-modifying therapy, but this is expected to change in the near future, thus opening the way to a new era of disease management.

According to the World Health Organization (WHO), a biomarker is “any substance, structure, or process that can be measured in the body or its products and influence or predict the incidence of outcome or disease”.

In this Special Issue, I would like to invite authors to submit studies focusing on prognostic biomarkers of neurological diseases. Authors are welcome to cover all areas of clinical neurology, including, but not limited to neurodegenerative diseases, neuroimmune/neuroinflammatory diseases, cerebrovascular diseases, brain tumors, and neuromuscular diseases.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
