Message from the Guest Editors

Dear Colleagues,

Treatment for vascular disease varies depends on the type and severity. Open and endovascular techniques represent the cornerstone of vascular surgery, treating a plethora of diseases in various vascular “beds” or target vessels.

Open surgical repair represents the traditional approach in various vascular territories, while endovascular techniques have caused a dramatic change in vascular surgery over the last years, characterized as “endovascular evolution” due to their rapid introduction, acceptance and development.

Both techniques are equally important in the vascular surgeon’s arsenal; however, considering open vs endovascular procedures, a variety of factors should be reviewed, including but not limited to the disease itself, the patient, the skill and experience of the treating physician, and the urgency of the procedure.

We are pleased to invite and welcome your peer-reviewed manuscripts on advances in vascular and endovascular surgery.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
