Message from the Guest Editors

Living with a chronic condition requires ongoing adjustment to physical, psychological, and social demands. To date, patients are expected to be flexible and to take an active role in their disease management in the form of self-management. To be able to do so, patients need certain problem-solving skills, have to make decisions, find and utilize resources, form partnership with their healthcare professionals, and take action. Given these requirements, most patients will need self-management support from healthcare professionals and relatives.

This Special Issue invites papers exploring the full range of (multidisciplinary) self-management support. We particularly welcome original research into components that contribute to the success or failure of self-management interventions and about how self-management support can be implemented and optimized to the patient's perspective.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
