Message from the Guest Editor

Dear Colleagues,

The field of spinal infections constitutes a demanding diagnostic and management problem for which multidisciplinary approach with spine surgeons, radiologists, and infectious disease specialists is required. Although traditional treatment may be sufficient for managing a portion of cases, recurrences of the infection and associated risks including pain, spinal instability, neurological impairment, and toxicity with long-term antibiotic usage have been reported. Among the pertinent practical open questions in the field of spinal infections are the benefits of spinal instrumentation, the role of emerging technologies in diagnosis and treatment, such as minimal invasive surgery, the design of novel implants and smart materials, and the optimization of antibiotic treatment. The aim of this Special Issue, therefore, is to provide a stage for outstanding clinical, technical, and epidemiological contributions describing recent advances that can lead to improvements of diagnosis, treatment, and prognosis in the field of spinal infections.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
