Message from the Guest Editors

Dear Colleagues,

The field of the male reproductive system, whose pathology and even physiology have been for a long time disregarded or ignored, is gaining increasingly more relevance across the world. Andrology can be defined as a unitary medical and surgical discipline dealing with the pathophysiology of the male reproductive system during the entire life course of the male subject, from development to maturity and senescence. The future of andrological medical and surgical treatments is exciting and, in this Special Issue, entitled “Clinical and Surgical Andrology: Current Challenges and Advances”, we present the latest cutting-edge developments in the fields of male infertility, erectile dysfunction, testis and penile cancer, ejaculation/orgasmic disorders and all the surgeries related to male sexual dysfunction. The aim of this Special Issue is to produce an outstanding updated collection that is able to provide sufficient information to help practitioners with the recent breakthroughs in this field and to guide them in improving and optimizing medical practice.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
