### Message from the Guest Editor

Dear Colleagues,

After the success of the Special Issue “[Clinical Management of Movement Disorders](#)”, this second volume aims to collect high-quality reviews, meta-analyses, and original articles with a potential impact on the clinical management of movement disorders. The Special Issue focuses on all aspects of clinical management, from relevant diagnostic techniques through to disease progression, symptom monitoring tools, and treatments. Advanced new technologies for personalized therapeutics are also welcome, along with classic overviews on phenomenology, investigative, translational, and treatment aspects.
