Message from the Guest Editors

Dear Colleagues,

Eczema (also known as atopic eczema or atopic dermatitis), is estimated to affect one in five school children, and is increasing worldwide. It is a condition that impacts on both the patient and their family, and has a large impact on healthcare resource use.

For such a common condition, it is perhaps surprising that there are still so many unanswered questions about its causes, possible strategies for its prevention, and the best and safest ways of treating the disease.

This Special Issue compiles articles that reflect current best practice from around the world in the management of eczema, along with new insights into the causes, mechanisms and strategies for prevention.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
