Message from the Guest Editors

Dear Colleagues,

Urinary and fecal incontinence has a significant influence on the quality of life in patients who report such symptoms. Epidemiological studies have shown that prevalence of these troublesome symptoms is higher in women. Some field experts have reported that urine and/or bowel leakage begins in puerperium, while others have indicated that disturbances of bladder and/or bowel functioning start in peri-menopause. It should also be underlined that many female patients have also reported the collateral coexistence of urinary and fecal incontinence. Therefore, there is still a need to introduce proper prophylaxis, diagnostics, and therapy of urinary and fecal incontinence in female patients as early as possible. This Special Issue invites authors to contribute original research and review articles that will encourage progress in the efforts to understand the pathophysiological mechanisms leading to the development of urinary and/or fecal incontinence in women, the impact of these symptoms on the quality of life, and the therapeutic options available for patients.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
