Deadline for manuscript
submissions:

30 December 2024

Message from the Guest Editor

Human abilities of attention and visual cognition are now of great interest to researchers in imaging and computer vision; the purpose of this issue is to present these human abilities in an accessible manner that speaks to those researchers and cognitive scientists in general, while providing a showcase for the brain. Ideal papers would provide big-picture insight into functional aspects of human attention and visual cognition. In addition, shorter papers that explore the interplay of high-level human and machine concepts are of interest.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The imaging term, specific with journal, is to be considered in its broadest sense. Image processing, image understanding and computer vision are all terms related to imaging acquisition, its processing and the extraction of relevant information from the scene to obtain the underlying knowledge. All tasks related to the above items are oriented toward specific applications in a broad range of areas and topics. The *Journal of Imaging* is conceived as an efficient vehicle in the scientific community for the communication and transmission of the progress and research results in the topics covered.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), PubMed, PMC, dblp, Inspec, Ei Compendex, and other databases.

Journal Rank: CiteScore - Q2 (*Computer Graphics and Computer-Aided Design*)
