Deadline for manuscript submissions:
closed (28 February 2019)

Message from the Guest Editor

With so many digital images available, there is an increasing risk of the unintended release of privacy information. This includes not only the image itself, but also associated metadata that could contain privacy information, such as positioning. We should also not forget about the management of the digital rights of the owners of the images.

The aim of this Special Issue is to identify these privacy risks and propose solutions, which ideally should maintain interoperability by means of International Standards.

Topics may include, but are not limited to:

- Privacy and security threats in standardized images;
- Limitations and improvements of current solutions in images privacy and security;
- Standard approaches to provide images with privacy and security;
- Blockchain as a solution for privacy and security in standardized images;
- Privacy in JPEG images: use cases, privacy rules, integration with format, etc;
- Digital rights management vs. privacy and security in standardized images;
- Alternatives to JPEG for improving privacy and security.

Message from the Editor-in-Chief

The imaging term, specific with journal, is to be considered in its broadest sense. Image processing, image understanding and computer vision are all terms related to imaging acquisition, its processing and the extraction of relevant information from the scene to obtain the underlying knowledge. All tasks related to the above items are oriented toward specific applications in a broad range of areas and topics. The *Journal of Imaging* is conceived as an efficient vehicle in the scientific community for the communication and transmission of the progress and research results in the topics covered.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, ESCI (Web of Science), PubMed, PMC, dblp, Inspec, Ei Compendex, and other databases.
Journal Rank: CiteScore - Q2 (*Computer Graphics and Computer-Aided Design*)
