Call for Papers

Dear Colleagues,

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Journal of Intelligence* (ISSN 2079-3200). It is an international, open access journal published by MDPI online quarterly.

Manuscripts prepared in Microsoft Word or LaTeX can be submitted to the Editorial Office online at www.mdpi.com. Detailed instructions for authors are also available online: www.mdpi.com/journal/jintelligence/instructions/

*Journal of Intelligence* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published.

*Journal of Intelligence* is a new journal and publication fees are fully waived for papers submitted in 2015. However, a fee of 250 CHF may apply for those articles that need major editing and formatting and/or English editing.

We would be pleased to welcome you as one of our authors.

Paul De Boeck

Aims & Scope

The *Journal of Intelligence* is a peer-reviewed scientific journal that publishes original empirical and theoretical articles, state-of-the-art articles and critical reviews, case studies, original short notes, commentaries, and letters.

Our aim is to offer an open access journal that moves forward the study of human intelligence: the basis and development of intelligence, its nature in terms of structure and processes, and its correlates and consequences, also including the measurement and modeling of intelligence.

Related topics such as artificial intelligence and animal intelligence are welcomed as far as they shed light on human intelligence. We encourage authors to document their results in as much detail as possible.

Scope:
- academic intelligence
- practical intelligence
- emotional intelligence
- social intelligence
- cognitive intelligence
- intellectual development
- giftedness
- intelligence and aging
- intellectual impairment
- intellectual disabilities
- cognitive (neuro-) science
- structural and functional brain imaging
- cognitive epidemiology
- formal models
- psychometrics
- intelligence tests
- assessment methods
- applied domains

*Journal of Intelligence* regularly publishes special issues on relevant and timely topics. Be sure to check our website for an updated list of special issues: www.mdpi.com/journal/jintelligence/special_issues/
Open Access. What does it really mean?

Open access is mainly a response to what is known as the serials crisis: yearly increasing journal subscription prices, which make subscription-based journals increasingly difficult to afford.

Many university libraries around the world have had to cancel existing subscriptions, or are unable to keep up with subscribing to new journals, because the cost of publication has risen disproportionately to their budgets.

With open access publishing, the cost of peer-review and production of an article is borne by the institute of the author by payment of a one-time flat fee. Conversely, readers and their institutes are no longer charged for accessing the journals they need.

For researchers, open access brings the convenience of immediate access to the literature that they need — no matter for which university or company they work, or whether they just want to read a paper in their spare time at home.

For authors, open access means a much wider circle of readers due to the easy access to their research papers. The interested general public is also able to access research works, giving higher transparency to the outcome of taxpayer money spent on research.

Publication Ethics Statement

The Journal of Intelligence is a member of the Committee on Publication Ethics (COPE). The Journal of Intelligence takes the responsibility to enforce a rigorous peer-review together with strict ethical policies and standards to ensure to add high quality scientific works to the field of scholarly publication.
