Message from the Guest Editors

Dear Colleagues,

The emerging technologies and the continuous improvement in the performances of smartphones and portable devices have allowed researchers to develop complex augmented reality and virtual reality applications able to offer different experiences in several ambits. In the marine fields, these applications and systems provide alternative and captivating solutions to several issues, such as sea protection, virtual diving, including the fruition of underwater cultural heritage and environmental monitoring. This Special Issue aims at collecting cutting-edge AR and VR research and solutions in the field of the marine science. Original research and reviews directly related to the exploitation of the AR and VR techniques in the marine science are encouraged to submit for publication.

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Engineering, Marine*) / CiteScore - Q2 (*Ocean Engineering*)
