Message from the Guest Editor

Dear Colleagues,

This Special issue aims at presenting the results of new studies on light fields in the ocean. The term of "light fields" is interpreted here to a wider extent, encompassing not just a complete description of the angular radiance distribution at a given point, but also a partial description or the derived quantities, such as irradiance, radiance reflectance, diffuse reflectance, albedo, etc. The light fields may relate to the water medium itself, the sea surface, the atmosphere over the ocean, or the sea bottom; the light may be unpolarized or polarized, the light source natural or artificial, stationary or pulsed. Both theoretical results and from-field measurements are welcome; the presentation of new ideas and their realization, in particular the practical applications for the investigation and monitoring of the ocean and seas are encouraged.

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Engineering, Marine*) / CiteScore - Q2 (*Ocean Engineering*)
