Message from the Guest Editors

Dear Colleagues,

Hormones play a fundamental role in the homeostasis of all organs and tissues. Therefore, endocrine dysfunction, both as an excess and defect, has a considerable impact on human health, particularly on the heart, bone tissue, skin, central and peripheral nervous systems, kidney and adipose tissue. However, the diagnosis of endocrine disorders is not always easy, and misdiagnoses can often occur due to multiple bias. Moreover, the treatment of endocrine disorders is also constantly evolving in search of the best therapeutic strategy for the same diseases.

In this Special Issue, original studies on all new aspects for the diagnosis and treatment of endocrine disorders are welcome, particularly relating to thyroid disease, osteoporosis, thyroid eye disease, thyroid cancer or adrenal diseases.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) CiteScore - Q2 (*Medicine (miscellaneous)*)
