Dr. Muhammad Mujtaba

Chief of Transplant, Medical
Director of Kidney
Transplantation, Division of
Nephrology, University of Texas
Medical Branch, Galveston, TX,
USA

Deadline for manuscript
submissions:

closed (5 October 2023)

Message from the Guest Editors

Dear Colleagues,

Transplantation has been nearly synonymous with personalized medicine, requiring specialized approaches to ABO blood typing, HLA classification, infectious disease treatment and prophylaxis, medication dosing, and surgical techniques. In the current era of precision medicine initiatives, the field of transplantation is ripe for innovation that is accelerating at a pace akin to Moore's Law. Practitioners in the field are constantly striving to provide the best possible care for patients in the context of shifting multi-level regulations and an urgency to meet the increasing demands for transplantable organs. Despite the progress, solutions to ongoing problems remain elusive, such as equitable allocation policies, pre-transplant risk assessment, optimal induction and maintenance immunosuppression regimens, and intelligent allograft monitoring protocols.

This Special Issue of the *Journal of Personalized Medicine* aims to highlight some of the latest studies applying precision medicine to improve the care of people with end stage organ disease who are in need of or have undergone transplantation.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) CiteScore - Q2 (*Medicine (miscellaneous)*)
