### Message from the Guest Editors

This Special Issue aims to update and put together the experimental evidence for marked individual differences in the response to and consequences of exposure to severe acute stressors and chronic stressful conditions in humans, including sex differences. The focus will be on putative biological markers, other than genetic differences, that can be evaluated with relatively non-invasive methods in biological fluids/tissues (saliva, urine, blood, or hair) or the whole body. These might include, but are not restricted to, endocrine and metabolic variables, changes associated with the activity of the autonomic nervous system, immune function, and electrophysiological and brain neuroimaging methods. Particular attention will be paid to the developmental aspects of individual differences and the variables that can be evaluated early in life and allow us to characterize susceptible or resilient people.

Deadline for manuscript  
submissions:

**closed (15 November 2021)**

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM; ISSN 2075-4426)* is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

**Journal Rank:** JCR - Q2 (*Medicine, General & Internal*) CiteScore - Q2 (*Medicine (miscellaneous)*)
