

## An Open Access Journal

### Editor-in-Chief

Prof. Dr. Dharma P. Agrawal

### Message from the Editor-in-Chief

I encourage you to contribute research and comprehensive review articles for publication in *Journal of Sensors and Actuator Networks (JSAN)*, an international, open access journal which provides an advanced forum for research findings in areas of sensors and actuators. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sensors and actuators and fostering applications of sensor-based measurements and effective actuator incorporation.

### Author Benefits

#### Open Access

Unlimited and free access for readers

#### No Copyright Constraints

Retain copyright of your work and free use of your article

#### Thorough Peer-Review

#### Coverage by Leading Indexing Services

DBLP Computer Science Bibliography (Universität Trier),  
DOAJ - Directory of Open Access Journals, INSPEC (IET)

#### No Space Constraints, No Extra Space or Color Charges

No restriction on the length of the papers, number of figures or colors

#### Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI membership program

#### High Visibility

Indexed in Emerging Sources Citation Index (ESCI-Web of Science)

## More Information about This Journal

### Aims and Scope

*JSAN* (ISSN 2224-2708) is an open access journal that provides an advanced forum for studies of sensors and actuators. All submitted manuscripts undergo rigorous peer review prior to publication.

The scope of *JSAN* includes:

- Embedded sensor systems
- System architecture and operating systems for sensor and actuator networks
- Tasking and self-management
- Communication and network protocols
- Synchronization, localization and power management
- Data processing, data storage and data management within sensor and actuator networks
- Programming models and middleware
- Simulation, experimental facilities and test beds
- Nano-sensors and body-area networks
- Sensor network as an integral part of IoT
- Applications for biomedical and environment monitoring, manufacturing, automation and precision agriculture, *etc.*
- Secured communication and security issues
- Privacy in data management
