

Optical Technologies for IoT, Smart Industry, and Smart Infrastructures

Guest Editor:

Prof. Slavisa Aleksic

Institute of Communications
Engineering, Leipzig University of
Telecommunications (HfTL),
Gustav-Freytag-Str. 43-45, 04277
Leipzig, Germany

Deadline for manuscript
submissions:

closed (30 November 2018)

Message from the Guest Editor

This Special Issue aims to publish original, significant, and visionary papers describing novel research on optical technologies, systems, and networks for application in distributed and smart sensing systems, M2M, IoT, smart industries, smart infrastructures, and smart cities. Submissions of current and original research results from experts in academia and industry worldwide are strongly encouraged.

Topics of interest include, but are not limited to:

Sensors based on optical materials and technologies

- Novel methods and structures for building optical sensors
- Applications of optical sensors
- Optical sensor networks
- Characterization of optical sensors

Optical communication systems and networks for IoT, smart industry, and smart infrastructures

- Optical transmission technologies for smart systems and infrastructures
- Optical networks for industry applications
- Optical wireless communications with application in smart industry and infrastructures

Message from the Editor-in-Chief

I encourage you to contribute research and comprehensive review articles for publication in Journal of Sensors and Actuator Networks (JSAN), an international, open access journal which provides an advanced forum for research findings in areas of sensors and actuators. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sensors and actuators and fostering applications of sensor-based measurements and effective actuator incorporation.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), dblp, Inspec, and other databases.

Journal Rank: CiteScore - Q1 (*Control and Optimization*)
