## Urban Form and the Urban Heat Island Effect

Guest Editors:

**Dr. Lawrence Lau**

Department of Land Surveying  
and Geo-Informatics, The Hong  
Kong Polytechnic University,  
Hong Kong 999077, China

**Prof. Dr. Rajnish Kaur Calay**

Faculty of Engineering &  
Technology, The Arctic University  
of Norway, UiT, Narvik Campus,  
8515 Narvik, Norway

**Dr. Isaac Yu Fat Lun**

Department of Architecture and  
Built Environment, University of  
Nottingham Ningbo China,  
Ningbo 315100, China

Deadline for manuscript  
submissions:

**closed (5 April 2024)**

### Message from the Guest Editors

Dear Colleagues,

Humans had use more of the Earth's land surface in order to accommodate the increase in the population and human activities. Urbanisation causes issues and problems to the ecosystem, the natural environment and humans, such as air and water pollution, high energy consumption, mental and physical health problems, etc. Studies on urban form and urban heat island (UHI) are crucial to analyse and reduce the adverse processes and consequences of urbanisation, and help with efficient and effective town planning.

Our aim is to publish high-quality papers on urban form options and their performance in relation to various current and future challenges, advanced observations and observational methods/technologies for UHI determination and monitoring, and the impact of building designs, land use and town planning on the UHI effect.

We will publish reviews, regular research papers, perspective and discussion papers, short communications and research notes, and there is no restriction on the length of the papers.

# Special Issue

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Christine Fürst

Institute for Geosciences and  
Geography, Department  
Sustainable Landscape  
Development, University of Halle,  
Von-Seckendorff-Platz 4, 06120  
Halle, Germany

## Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q2 (*Nature and Landscape Conservation*)
