### Message from the Guest Editors

Dear Colleagues,

This Special Issue will collect contributions that focus on (but are not limited to) improved soil and water resources management and the achievement of SDG targets related to land, such as:

- Nature-based solutions to land degradation neutrality that contribute to climate change and climate extremes mitigation;
- Improvement of ecosystem services through soil health and water management;
- Soil and water conservation with sustainable management practices;
- Socioeconomic approaches to achieve better land management and land degradation neutrality;
- Cross-sectoral collaboration, stakeholder engagement, and transdisciplinary approaches to achieve land degradation neutrality.

We look forward to receiving your original research articles and reviews.

## Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q2 (*Nature and Landscape Conservation*)
