Message from the Guest Editors

Dear Colleagues,

We are pleased to invite you to submit studies related to the Special Issue subject of “Soil Management for Soil Health” in *Land*.

Soil is a critical resource—the way in which it is managed can improve or degrade the quality of that resource. Healthy soil is the basis for profitable, productive, and environmentally sound agricultural systems.

In this Special Issue, we welcome the submissions of both research and review papers focusing on, but not limited to, the following topics:

- Preventing, minimizing, and mitigating soil-quality decline, e.g., compaction, contamination, salinization, and acidification;
- Managing soil nutrients;
- Maintaining and improving soil organic matter;
- Cover crops and rotations/diversity;
- No till/conservation tillage;
- Root–soil interactions;
- Maintaining soil structure;
- Minimizing soil erosion from agricultural land;
- Maintaining or improving soil water-holding capacity;
- Fostering beneficial soil biological activity;
- Pest and disease management.

Special Issue

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q2 (*Nature and Landscape Conservation*)
