Deadline for manuscript submissions:

**30 June 2024**

### Message from the Guest Editors

Dear Colleagues,

Due to urbanization, climate change, and the rapid growth of the population, the agricultural sector is under tremendous pressure. Despite the obstacles of agricultural production in many regions due to land degradation, extreme climate events, and plant diseases, the agricultural industry must feed more than 9 billion people by 2050 and 12 billion people by 2100.

Recently, researchers have emphasized that the quality of soil and environment, along with ecosystem services, are being severely degraded as a result of unsustainable land management and the industrialization of agriculture. Thus, to achieve sustainability in the agricultural sector, a holistic approach to analyze the interaction between agricultural activities and ecosystem should be conducted, under ongoing climate change.

The focus of this Special Issue of *Land* is the current state of knowledge on sustainability in agriculture. New insights, which could be presented as research papers, reviews, and case reports, are welcome. Papers with a multidisciplinary dimension in agricultural systems are also encouraged.

## Editor-in-Chief

### Prof. Dr. Christine Fürst

Institute for Geosciences and  
Geography, Department  
Sustainable Landscape  
Development, University of Halle,  
Von-Seckendorff-Platz 4, 06120  
Halle, Germany

## Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q2 (*Nature and Landscape Conservation*)
