Urban Resilience and Urban Sustainability under Climate Change

Guest Editors:

Prof. Dr. Lorenzo Ros-McDonnell

Industrial Engineering Research Group, Polytechnic University of Cartagena, 30202 Cartagena, Spain

Dr. Nir Y. Krakauer

Department of Civil Engineering, City College of New York, New York, NY 10031, USA

Deadline for manuscript submissions:
closed (5 April 2024)

Message from the Guest Editors

Dear Colleagues,

The concept of resilience is gaining increasing attention in various fields related to cities and climate change. Although there is some disagreement among different sources on defining and measuring resilience, there is a broad consensus that:

- Cities must be resilient to a wide range of shocks and stresses in the face of climate change; and
- Efforts to foster resilience to climate change must be coupled with efforts to promote urban development and sustainability.

Emerging issues for future studies should highlight some of the challenges associated with the practical application of resilience approaches. Research areas may include (but are not limited to) the following:

- defining and measuring urban resilience and climate change;
- urban sustainability and climate change;
- Urban use of resources across to urban resilience and sustainability;
- Urban citizen movement and urban resilience and sustainability;
- Urban freight movement and urban resilience and sustainability;
- Urban commons, community organizations, and the “third sector” as factors in “smart city” concepts and resilience

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and
Geography, Department
Sustainable Landscape
Development, University of Halle,
Von-Seckendorff-Platz 4, 06120
Halle, Germany

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q2 (*Nature and Landscape Conservation*)
