Deadline for manuscript submissions:

5 September 2024

Message from the Guest Editors

Dear Colleagues,

Spatial planning is considered a discipline with an integral and interdisciplinary approach aimed at sustainable and balanced socioeconomic development from the planetary to the local scale. This requires a strong will on the part of public administrations to articulate a set of policies and models clearly oriented in this direction.

For this Special Issue, we are interested in contributions related to spatial planning and sustainable development, from the local to the international scale, to address the challenge of territorial socioeconomic imbalances, either through empirical research or conceptual work, examining any key processes, among others:

Territorial imbalances and socioeconomic cohesion;

Polycentric urban networks: territorial structuring and regional development;

Global policies and programs;

Sectorial policies and programs (urban, rural, etc.);

Urban–rural interactions: partnerships;

Analysis techniques: geospatial statistics and geographic information systems (GISs);

Citizen participation: project generation and management;

Vertical and horizontal governance;

Results and monitoring system of indicators.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q2 (*Nature and Landscape Conservation*)
