Message from the Guest Editors

We are going to publish a special edition of *Land* to cover the research undertaken in the area of biochar-complemented compost. The Special Issue will cover the production, characterization and application of this material. We are facing a phenomenal increase in organic wastes. On the other hand, areas of degraded land are expanding quickly, thereby affecting their urban, agricultural and industrial use. Compost, biochar or their mixtures are considered as materials for resolving these issues.
