Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to stress the importance of historical information and data as a strategic tool in framing planning decisions. Research areas may include (but are not limited to) the following themes:

- Use of historical information in hazard and risk analysis;
- Use of historical sources to assess and mitigate natural hazard risks to cultural heritage;
- Land use planning and geo-risk assessment using historical data;
- Analysis of the spatial-temporal distribution of extreme events;
- Methodologies for data collection and management from documentary sources;
- Geomorphological hazard and risk studies by historical sources;
- Historical climatology and reconstruction of extreme weather events;
- The analysis of natural hazards in data-poor regions.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
