Message from the Guest Editors

Dear Colleagues,

Anterior eye health is necessary to guarantee good vision and quality of life; a huge number of anterior eye conditions are leading causes of ocular morbidity with different impacts on subject vision.

This Special Issue invites original articles and reviews focusing on the broad topic of cornea, anterior eye diseases and eye diseases from in vitro/in vivo models, the evaluation of technology for corneal and anterior eye clinical assessment (topography, tomography, specular microscopy, biometry, etc.), and improvements in eye condition diagnosis and patient management with experimental and/or clinical evidence across a wide range of patients (pediatric, adults and ancient), with particular attention paid to primary eye care practice (early diagnosis), interdisciplinary collaboration and the management of patients' quality of life.
