Deadline for manuscript
submissions:

31 December 2024

Message from the Guest Editors

In humans, anthrax can occur in three different forms with clinical signs dependent on the penetration route of the pathogen: cutaneous, pulmonary, and gastrointestinal. Moreover, another fatal form has been described in drug users occurring after the intravenous injection of drugs contaminated with anthrax spores. *B. anthracis* lives most of its existence in the form of spores in soils, until ideal conditions develop, allowing it to enter the reproductive cycle, which is presented mainly in domestic and wild ruminants. Furthermore, *B. anthracis* is considered one of the most important agents of bioterrorism. Because of its characteristics, it can be potentially misused as a biological weapon.

In this Special Issue, we aim to both summarize current knowledge and explore emerging themes and developments in our understanding of the pathogen and of the disease. We, thus, invite the submission of research and review articles that cover any aspect of the bacteriology, epidemiology, molecular biology, genomics, immunology, pathogenesis, vaccine development, new decontaminants or diagnostics of anthrax. We look forward to your contributions.

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Biology*) / CiteScore - Q2 (*Paleontology*)
