### Message from the Guest Editors

We welcome submissions from all fields of plastic and reconstructive research to expand the dialogue on how plastic and reconstructive surgery can transform and enhance patients' lives.

Potential topics may include:

- Imaging for surgical planning and evaluation of outcomes.
- The role of artificial intelligence in improved decision making and patient outcomes.
- Cell-based tissue repair for functional deficits, including the use of stem cells and other regenerative therapies.
- Rehabilitation after reconstructive surgery to optimize functional recovery and quality of life.
- Approaches to peripheral nerve reconstruction and monitoring of motor and sensory recovery.
- Facial reconstruction techniques for a range of functional and aesthetic concerns, including facial paralysis, trauma, and congenital anomalies.
- Breast reconstruction options and outcomes, including techniques for immediate and delayed reconstruction following mastectomy.
- Surgical management of lymphedema, including microsurgical lymphatic reconstruction and other innovative approaches.
