Message from the Guest Editor

Dear Colleagues,

In recent years, there has been increasing interest in marine pollution owing to several microplastics. One of the possible solutions to this problem is focused on the application of biodegradable plastics. However, there are very few studies on the biodegradation of plastics and polymers, especially in seawater or marine environment. With the opening of this Special Issue, “Marine Biodegradable Polymers”, we are planning to produce a strong, and very exciting issue that will encompass breakthroughs on highly valuable, scientific, and industrial research in this field.

Message from the Editor-in-Chief

During the past few decades there has been an ever increasing number of novel compounds discovered in the marine environment. This is exemplified by the robust preclinical and clinical pipeline that currently exists for marine natural products. *Marine Drugs* is inviting contributions on new advances in marine biotechnology, pharmacology, chemical ecology, synthetic biology, and genomics approaches related to the discovery of therapeutically relevant marine natural products. Our goal is to share your contribution in a timely fashion and in a manner that will be valued by the scientific community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Embase](#), [PubAg](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmacology, Toxicology and Pharmaceutics (miscellaneous)*)
