Functional Differential Equations: Theory and Applications-Dedicated to the Memory of Nikolay V. Azbelev on the Occasion of His 100th Birthday Anniversary

Guest Editors:

Prof. Dr. Vladimir P. Maksimov

Department of Information Systems and Mathematical Methods in Economics, Perm State University, 614990 Perm, Russia

Prof. Dr. Alexander Domoshnitsky

Department of Mathematics, Ariel University, Ariel 40700, Israel

Deadline for manuscript submissions:

closed (31 October 2023)

Message from the Guest Editors

This Issue is dedicated to the memory of Professor Nikolay Azbelev on the occasion of his 100th birthday anniversary.

Professor N. Azbelev, a well-known Russian mathematician, has been a leading figure in the integral and functional differential equations profession for about five decades. He is one of creators of the contemporary Theory of Functional Differential Equations. Today, this theory is being developed by the efforts of researchers from many countries in order to find more relevant applications.

The key idea of the Issue is to present new high-quality results in all major sections of the theory and in its applications. The topic of the Issue covers the following sections of the theory, but is not limited to them: general theory, boundary value problems, control problems, stability, asymptotic properties of solutions, oscillation/non-oscillation, numerical methods, and reliable computing.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and Informatics, De Montfort University, The Gateway, Leicester LE1 9BH, UK

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The iournal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering sociology. particularly those that and stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (*Mathematics*) / CiteScore - Q1 (*General Mathematics*)
