Quantum Computing for Industrial Applications

Guest Editor:

Prof. Dr. Jose L. Salmeron
Data Science Laboratory,
Universidad Pablo de Olavide,
Seville, Spain

Deadline for manuscript
submissions:
25 December 2024

Message from the Guest Editor

This Special Issue of *Mathematics* welcomes academic and industrial research on quantum computing. Topics include, but are not limited to:

- Practical implementations of quantum machine learning;
- Quantum machine learning algorithms;
- Quantum programming languages;
- Distributed quantum machine learning;
- Quantum machine learning in drug discovery;
- Quantum machine learning for classification;
- Quantum machine learning for regression;
- Quantum machine learning for reinforcement learning;
- Quantum computing for simulation purposes.

Special Issue

Editor-in-Chief

Prof. Dr. Francisco Chiclana
School of Computer Science and Informatics, De Montfort University, The Gateway, Leicester LE1 9BH, UK

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.
Journal Rank: JCR - Q1 (*Mathematics*) / CiteScore - Q1 (*General Mathematics*)
