Dr. Loreta Strumylaitė

Laboratory of Toxicology,
Neuroscience Institute,
Lithuanian University of Health
Sciences, Kaunas, Lithuania

Deadline for manuscript
submissions:

31 December 2024

Message from the Guest Editors

WHO identifies the monitoring of health and risk factors as an important tool for research and clinical practice at both the individual and population level. The WHO, the European Commission and other authorities initiate surveillance studies involving many countries with the aim to evaluate the long-term health status, risk factors and trends in different populations and to promote prevention of diseases worldwide. The CDC (Centers for Disease Control and Prevention) has launched surveillance modernization initiative.

Public health monitoring is of little use without the dissemination of results and knowledge.

This Special Issue aims to publish original research articles, literature reviews, and tutorials concerning the advances in health and risk factors monitoring at both individual and population level for various populations. Articles on monitoring using classical means and modern digital tools are welcome.

We appreciate your scientific achievements and look forward to receiving your articles.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), and [other databases](#).

Journal Rank: CiteScore - Q2 (*General Medicine*)
