## Update on Orthopedic Surgeries of the Lower Extremity Diseases and Injuries: 2nd Edition

Guest Editor:

### Dr. Woo Jong Kim

Department of Orthopaedic Surgery, Soonchunhyang University Hospital Cheonan, 31, Suncheonhyang 6-gil, Dongam-gu, Cheonan 31151, Republic of Korea

Deadline for manuscript submissions:

**31 August 2024**

### Message from the Guest Editor

The hips and lower extremities, including the feet and ankles, have received much attention, and there have been many more research-related and technological advances in orthopedic surgery on these regions compared to other body parts. Various diseases and deformities, trauma, and sports injuries can afflict this area of the body, and the field of orthopedics is evolving day by day.

Accordingly, a number of new challenges have emerged, and many researchers want to share their updated knowledge and research. One of *Medicina's* Special Issues “[Update on Orthopedic Surgeries of the Lower Extremity Diseases and Injuries](#)”, started in May 2022 and has been searched more than 35,000 times; additionally, more than 28 papers have been published so far. Thanks to the support of many authors, we are pleased to announce the launch of a second edition of this Special Issue. This Special Issue will focus on research papers related to lower extremity diseases or injuries, clinical studies, biomechanics, and trauma- and sport-related medical fields with regard to orthopedic surgeries. We look forward to inviting authors to submit reviews or original research that fit this scope.
