Last updated: February 2014. Please check the journal website for the latest version of the flyer.
Call for Papers

Dear Colleagues,

You are invited to contribute a research article or a comprehensive review for consideration and publication in Medical Sciences (ISSN 2076-3271). Medical Sciences is an international, peer-reviewed, open access journal (free for readers), published by MDPI online quarterly.

Manuscripts prepared in Microsoft Word or LaTeX can be submitted to the Editorial Office online at www.mdpi.com. Detailed instructions for authors are also available online: www.mdpi.com/journal/medsci/instructions/

Medical Sciences is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published.

Medical Sciences is a new journal and publication fees are fully waived for papers submitted in 2014. However, a fee of 250 CHF may apply for those articles that need major editing and formatting and/or English editing.

We would be pleased to welcome you as one of our authors.

Prof. Dr. Yun Yen

Aims & Scope

Medical Sciences is an international scientific open access journal, providing a platform for advances in research related to medical science. The journal aims to encompass the multidisciplinary and interdisciplinary research that is needed to lead to the prevention and treatment of diseases and illness.

Our aim is to encourage scientists to publish their theoretical and experimental results in as much detail as possible. There is no restriction on the length of papers. There are, in addition, two unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files regarding the full details of the calculation and experimental procedure can be deposited as supplementary material (including animated pictures, interactive Excel sheets, and others).

Scope:
- Medicine sciences (fundamental and clinic)
- Biomedical sciences
- Biochemistry
- Molecular biology
- Anatomy
- Biomechanics
- Biostatistics
- Cytology
- Embryology
- Epidemiology
- Genetics
- Neuroscience
- Nutrition science
- Pharmacology
- Immunology

Medical Sciences regularly publishes special issues on relevant and timely topics. Be sure to check our website for an updated list of special issues: www.mdpi.com/journal/medsci/

Open Access. What does it really mean?

Open access is mainly a response to what is known as the serials crisis: yearly increasing journal subscription prices, which make subscription-based journals increasingly difficult to afford.

Many university libraries around the world have had to cancel existing subscriptions, or are unable to keep up with subscribing to new journals, because the cost of publication has risen disproportionately to their budgets.

With open access publishing, the cost of peer-review and production of an article is borne by the institute of the author by payment of a one-time flat fee. Conversely, readers and their institutes are no longer charged for accessing the journals they need.

For researchers, open access brings the convenience of immediate access to the literature that they need — no matter for which university or company they work, or whether they just want to read a paper in their spare time at home.

For authors, open access means a much wider circle of readers due to the easy access to their research papers. The interested general public is also able to access research works, giving higher transparency to the outcome of taxpayer money spent on research.
