Message from the Guest Editor

Dear Colleagues,

Recent advances in MOF (Metal Organic Framework) and MOF-based membranes have created unique opportunities in the areas of adsorption, separation, sequestration, catalysis, energy storage, carbon capture, sensing, etc.

The objective of this Special Issue is to publish in the area of simulation, design (2D and 3D), materials chemistry, synthesis, processing and characterization of organic and inorganic MOF, MOF-based fibers, membranes and thin films. The topics of interests include, but are not limited to, novel micro scale and nanoscale MOF and its flexible fiber and membrane, MOF based composite membranes, thin films, computational simulation of advanced membrane materials, analysis of MOF materials chemistry, physical properties, development of characterization and testing methods and tools, etc.

Authors are, therefore, cordially invited to submit their exciting works in the form of original research papers, technical communications and review articles for Membranes. Membranes is indexed by EI, Scopus, PubMed, and ESCI. We are committed to maintaining a high quality and make a positive impact in the scientific community. <br

Editor-in-Chief

Prof. Dr. Spas D. Kolev

School of Chemistry, The University of Melbourne, Melbourne, VIC 3010, Australia

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375).

Membranes is an international, peer-reviewed open accessjournal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and nonbiological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Polymer Science*) / CiteScore - Q2 (*Chemical Engineering* (*miscellaneous*))
