

## Drug Metabolism and New Drug Development for Cancers

Guest Editors:

**Prof. Dr. Anna Jelińska**

Department of Pharmaceutical  
Chemistry, Poznan University of  
Medical Sciences, 60-780 Poznan,  
Poland

**Dr. Szymon Tomczak**

Department of Pharmaceutical  
Chemistry, Poznan University of  
Medical Sciences, 60-780 Poznan,  
Poland

Deadline for manuscript  
submissions:

**31 July 2024**

### Message from the Guest Editors

Cancer is one of the top causes of death worldwide. However, medical sciences do not remain indifferent and the race is on, the primary goal of which is to help patients through the development of new anticancer drugs and treatments. Understanding metabolic pathways and developing new molecules and formulations for drug delivery are only some of the possible weapons in this unequal fight. The path from developing an active ingredient to implementing the drug into clinical practice is long and involves the work of many specialists.

This Special Issue aims to publish original articles and review articles on the following topics:

- The biochemistry of anticancer molecules.
- The impact of anticancer drugs/substances on metabolism.
- Natural compounds/extracts and plant screening for antineoplastic activity metabolites.
- Studies in pharmaceutical chemistry: drug structure and activity relationships or the development of new molecules.
- Developing new delivery methods for known substances, for example, formulating new nanoforms such as liposomes, micelles, nanospheres, etc.

an Open Access Journal by MDPI

## Editor-in-Chief

### Dr. Amedeo Lonardo

1. Formerly Director of the Simple Operating Unit "Metabolic Syndrome", Azienda Ospedaliero-Universitaria, 41126 Modena, Italy  
2. Formerly Professor of Internal Medicine, School of Specialization of Allergology and Clinical Immunology, University of Modena and Reggio Emilia, 41121 Modena, Italy

## Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Biochemistry & Molecular Biology*) / CiteScore - Q2 (*Endocrinology, Diabetes and Metabolism*)
