Department of Applied Physics  
and Materials Engineering, E.T.S.  
Ingenieros Industriales,  
Polytechnical University of  
Madrid, 28040 Madrid, Spain

**Prof. Dr. Janez Grum**

Faculty of Mechanical  
Engineering, University of  
Ljubljana, Askerceva 6, 1000  
Ljubljana, Slovenia

Deadline for manuscript  
submissions:

**closed (30 September 2019)**

### Message from the Guest Editors

Laser Shock Processing (LSP) has been developed as an effective technology for improving the surface and mechanical properties of metallic alloys. The level of maturity of Laser Shock Processing has been increasing during the last few years, and several thematic international conferences have been organized (the 7<sup>th</sup> ICLPRP will be held in Singapore, June 17–22, 2018), where different developments on a number of key aspects have been discussed, i.e.:

- Fundamental Laser Interaction Phenomena
- Material Behavior at High Deformation Rates/Under Intense Shock Waves
- Laser Sources and Experimental Processes Implementation
- Induced Microstructural/Surface/Stress Effects
- Mechanical and Surface Properties Experimental Characterization and Testing
- Numerical Process Simulation
- Development and Validation of Applications
- Comparison of LSP to Competing Technologies
- Novel Related Processes

which have been treated by renowned specialists, providing a firm basis for the further development of the technology in its path to industrial penetration.

an Open Access Journal by MDPI

## Editors-in-Chief

### **Prof. Dr. Hugo F. Lopez**

Department of Materials Science  
and Engineering, College of  
Engineering & Applied Science,  
University of Wisconsin-  
Milwaukee, 3200 N. Cramer  
Street, Milwaukee, WI 53211, USA

### **Prof. Dr. Yong Zhang**

Beijing Advanced Innovation  
Center of Materials Genome  
Engineering, State Key  
Laboratory for Advanced Metals  
and Materials, University of  
Science and Technology Beijing,  
30 Xueyuan Road, Beijing 100083,  
China

## Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus**, **SCIE (Web of Science)**, **Inspec**, **CAPLUS / SciFinder**, and **other databases**.

**Journal Rank:** JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q1 (*Metals and Alloys*)
